## WORK IN PROGRESS

**Do Minimum Wages Protect Precarious Workers? Evidence from Zero-Hours Contracts**
Using a regression discontinuity design, I examine the effects of the minimum wage on workers with uncertain hours of employment, addressing employer anticipation effects.

**The Antitrust Risks of Algorithmic Rent Pricing: Evidence from the RealPage Ban**
Using a difference-in-differences design, I examine the effects of banning a popular platform used by US landlords to set rents.

**Staying Longer, Going Further? The Impact of Education Reforms on University Participation** (with Jessica Botros)
Using a difference-in-discontinuities design, we examine how reforms that extended time in education affected educational attainment and labour market outcomes.

**Graduating in Hard Times: Recessions and the Graduate Wage Premium** (with

Jessica Botros)
Using a pseudo difference-in-differences strategy, we estimate the within-cohort effects of recessions by exploiting the erosion of the graduate premium.
